DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/27/2008 has been entered.

Response to Amendment

2. The amendment filed on 02/22/2008 has been entered. The amendment to the specification overcomes the objection to the specification. The amendment to the claims overcomes the 112 second paragraph table issue and the 112 second paragraph how to change the size issue.

Drawings

3. The 03/06/2006 office action at page 2 paragraph 1 stated with regard to the 12/05/2005 replacement sheets of drawings "the handwritten Prior Art needs to be typed". Thus, replacement sheets for figures 1A-6C are required.

Response to Arguments

4. Applicant's arguments filed 02/22/2008 have been fully considered and after further consideration of the 03/13/2008 Advisory Action and the document provided with the 03/13/2008 Advisory Action the issue of "print function" is overcome by reference to applicants figures 9 to 11 where image processing apparatus 1 is connected to printer

Art Unit: 2628

200 and 220 or within printer 210 and where image processing apparatus 1 performs a print function as discussed at pages 25-27.

Page 25 lines 20-23 states:

The image data thus processed with the image processing apparatus in this case is transmitted to an output unit 200, such as a printer, and an output processing of printing out etc. is carried out there.

Page 26 line 21 to page 27 line 2 states:

Then, in this case, image data supplied from the computer 110 is processed with the image processing apparatus thus-included in the output unit 210, and an output processing of printing etc. is carried out under the control of an output control circuit or so also included there.

Page 27 lines 9-16 states:

Typically, the image processing apparatus in this case may be realized by a computer provided only for image processing in a form of a separate computer 120. Alternatively, in this case, the image processing apparatus 1 is provided independently on an I/F (interface) 50, and, thus, belongs to neither the computer 120 nor the printer 220, but the part which connects therebetween.

Thus, the output of image processing apparatus 1 conveys the claimed "print function".

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance:

Art Unit: 2628

The prior art of record fails to teach or suggest in the context of the independent claims "the adjustment of the sharing ratio is made in such a manner that the sharing ratio is gradually changed, a required time duration is calculated every time of the gradual changing of the sharing ratio".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Renumbering

6. The claims have been renumbered as follows.
